EXPERIENCE

• Silicon Shoring FS Reply

Consultant - AI Solution Lead

Oct 2025 - Present

Milano, Italia

- Acted as AI Solution Lead for a conversational AI assistant in the credit and lending domain for **Crédit Agricole**, coordinating Front-End and Back-End development activities.
- Contributed to the development of an AI assistant supporting automated credit approval workflows, supporting credit management teams in evaluating loan and mortgage simulations through conversational interactions with AI agents.
- Collaborated on AI integration initiatives leveraging **OpenAI GPT models**, **GitHub Copilot**, and cloud-native architectures on AWS and Azure.
- Contributed to project coordination, technical alignment, and delivery activities within Agile environments.

• Silicon Shoring FS Reply

Consultant - Lead Front-End Developer - Team Management Focus

Jan 2025 - Oct 2025

Milano, Italia

- Continued leading Front-End development activities for enterprise banking platforms, coordinating development teams and contributing to scalable and modern architectures.
- Led the Front-End team for the **SDLC AI Platform**, an AI-powered solution supporting the **Software Development Life Cycle** through intelligent automation and real-time collaboration features.
- Designed and developed advanced Front-End functionalities using **Angular 18**, integrating cloud-native solutions on **AWS** and **Microsoft Azure** with environments based on **Docker** and **Kubernetes**.
- Implemented real-time communication modules, including streaming conversational interfaces using **ndjson**, improving responsiveness and scalability of AI-driven interactions.
- Contributed to **BPER** initiatives related to SDLC evolution projects and payment channel applications for public entities.
- Worked with technologies including **Angular**, **Kafka**, **MongoDB**, **Karma**, REST APIs, AWS, and Azure within Agile environments.

• Iriscube Reply

Consultant - Lead Front-End Developer - Team Management Focus

Oct 2023 - Jan 2025

Milano, Italia

- Coordinated the migration and modernization of internal banking applications for **Intesa Sanpaolo Filiale Digitale**, transforming legacy systems into a scalable, future-ready solution that enhances **efficiency** and optimizes **digital banking services** through innovative architecture and streamlined processes.
- Led the development of **IsyPrestito**, a flagship loan product for **IsyBank**, by coordinating a team of 5 developers. The team modernized legacy processes into a seamless, omnichannel solution that integrates across digital and in-branch channels. The solution received positive feedback for enhancing **user engagement**, adaptability, and flexibility, paving the way for future product innovations.
- Developed expertise in resource management, including **planning**, **micro-planning**, and estimating, optimizing team performance through efficient **project management** and **regular performance evaluations**.
- Contributed to the development of a **customer account sales workflow** for **BPER**, leveraging cutting-edge technologies such as **Angular 14** and a **Microfrontend architecture** powered by **Webpack**, delivering a scalable, maintainable, and future-ready solution.

• Iriscube Reply

Consultant - Lead Front-End Developer

Oct 2022 - Oct 2023

Milano, Italia

- Promoted to **Lead Front-End Developer**, leading a team of 4 developers in the development of **Anticipo Stipendio** and **Spensierata Customer Journeys** for **IsyBank**, driving the bank's entry into the *digital lending market* with innovative loan solutions tailored for online users.

- Developed a hybrid application using **Angular**, integrated into **IsyBank's Mobile App** via **iframe**, designed with a *scalable* and **modular Front-end architecture** to enable future migration to a fully web-based solution. The system ensures seamless interaction between the hybrid app and the host app's ecosystem, driving **innovation and market impact**.
- The **UI** was guided by prototypes provided by UX/UI designers using **Adobe XD**, resulting in a smooth and engaging user experience. Utilized **Bitbucket** and **Jenkins** to streamline **CI/CD** pipelines and optimize deployment processes.
- Designed the loan sales process as *reusable and customizable*, fostering adaptability for future product launches and reinforcing the bank's leadership in **digital finance** solutions.

• Iriscube Reply

Oct 2020 - Oct 2022

Consultant - Front-End Developer

Milano, Italia

- Collaborated as a *Front-End Developer* for **Retail Lending Open** at **Intesa Sanpaolo**, optimizing the *loan sales process* to enhance the *customer journey* through **dynamic, responsive interfaces**.
- Designed and developed *responsive, scalable interfaces* using **Angular 7**, implementing **hybrid solutions** aligned with industry best practices in **API design**, *front-end optimization*, and *performance debugging*.
- Developed *reusable UI components* with a focus on **Microservices architecture**, ensuring seamless integration of front-end and back-end systems with an emphasis on maintainability and scalability.

• AIRLab POLIMI

Sep 2022 - May 2023

Master Thesis Researcher

Milano, Lombardia, Italia

- Conducted research on **emotion detection** to improve human-machine interactions in virtual environments, leveraging **Python** for data processing and analysis in a *wearable device network* with **accelerometers**.
- Applied **AI algorithms** (RNNs, CNNs, DNNs) for emotion classification, enhancing detection accuracy.
- Tested the system with a **custom robot** in the *Physical Metaverse* to simulate real-world applications.
- **Publication:** *Exploiting Accelerometers for Emotion Recognition in the Physical Metaverse Context*. Master's Thesis, Politecnico di Milano, Cirillo, Pasquale; Duraccio, Federica (May 4, 2023).

• Sense Square

May 2020 - July 2020

Software Engineering Intern

Salerno, Remote

- Designed and implemented a **Python** based **ETL tool** to process and analyze **atmospheric pollution data**, enhancing processing efficiency and streamlining data workflows.
- Automated data processing pipelines to ensure accuracy and consistency, significantly reducing manual intervention.

EDUCATION

• Politecnico di Milano

September 2020 - May 2023

Master Degree in Computer Science and Engineering

Milano, Italy

- Grade: 106/110

• Università degli Studi di Salerno

September 2017 - July 2020

Bachelor Degree in Computer Engineering

Salerno, Italy

- Grade: 110L/110

PROJECTS

• Bird Hunt: 3D Game Development in WebGL

Sep 2021 - Dec 2021

Tools: *OpenGL, WebGL, JavaScript*

- Created **Bird Hunt**, a 3D interactive game featuring detailed models, intuitive player controls, and responsive interactions.
- Applied key principles in Computer Graphics, including **rendering, shading, and camera dynamics**, showcasing technical skill in 3D game environments.

TECHNICAL SKILLS

- Programming Languages:** JavaScript | TypeScript | HTML | CSS | SCSS | Python | Java
- Web Development:** (Angular 7–19) | Node.js | REST APIs | Bootstrap | Flexbox | CSS Grid | Microfrontends
- Front-End Architecture:** Scalable & Responsive Design | Front-End Architecture | Performance Optimization | Web Accessibility | Modular Design
- Cloud & DevOps:** AWS | Microsoft Azure | Docker | Kubernetes | OpenShift | Jenkins | Git | CI/CD
- AI & Developer Productivity:** OpenAI GPT | GitHub Copilot | Conversational AI | AI Agent Integration | Prompt Engineering
- Data Management & Messaging:** MongoDB | Kafka | MySQL | PostgreSQL | Pandas | NumPy
- Testing & Quality:** Karma | Front-End Testing | Debugging | API Integration Testing
- Log Management & Monitoring:** Splunk | Kibana
- Design & Collaboration Tools:** Figma | Adobe XD | Jira | Confluence | RTC | Teams | Trello
- Architecture & Methodologies:** Microservices | Agile Methodologies | Omnichannel Design | Technical Documentation
- IoT & Embedded Systems:** Arduino | Raspberry Pi | MQTT | IoT Device Integration

SOFT SKILLS

- Leadership:** Technical Leadership | Team Coordination | Mentoring | Task Delegation
- Communication:** Client Interaction | Cross-Team Collaboration | Stakeholder Communication | Technical Alignment
- Problem Solving:** Critical Thinking | Root Cause Analysis | Troubleshooting | Solution-Oriented Mindset
- Project Coordination:** Planning | Prioritization | Delivery Support | Agile Collaboration
- Adaptability:** Fast Learner | Open to New Challenges | Flexibility in Dynamic Environments
- Stress Management:** Handling Pressure | Deadline Management | Maintaining Productivity Under High-Impact Deliveries
